Responsibilities:
- ➢ To perform Android App automation.
- ➢ To perform iOS App automation.
- ➢ To create, modify, and execute Scripts.
- ➢ To perform manual testing of app.
- ➢ To review pull requests of team.
- ➢ To resolve repository related issues for team.
- ➢ To create and maintain Jenkins pipeline.

PROJECT DETAILS 2:

Title: StageWrite (Web App: https://web.stagewriteapp.com & iOS App)

Environment: Angular, MongoDB and iOS

Duration: June 2015 to May 2020

Client: Jeff Whiting (USA)

Role: Manual Tester/Automation Tester

Description:

Stage Write Software, a division of Open Jar Productions, is dedicated to the creation of software and digital solutions for the entertainment community, including Broadway shows, special events around the world. Any stage manager, director or choreographer will attest that the process of documenting staging and choreography is a tedious process. Until now, there's been no method available except that of hand-drawn charts which are unappealing, often inaccurate, and are difficult to share. With this method, the user only has to enter the stage dimensions ONE TIME, create the actor icon ONE TIME, and then easily drag the performer icons into the desired position. This method saves thousands of HOURS of time and the final product is clean and easy-to-share. The app is being used by the top professionals in event planning, allowing the user to create the perfect layout for the venue, table placement.

Responsibilities:
- ➢ To perform Web App automation.
- ➢ To perform iOS App automation.
- ➢ To create, modify, and execute Scripts.
- ➢ To perform R&Ds.
- ➢ To create automation documentation.

PROJECT DETAILS 3:

Title: GetAssist (WebApp: https://www.getassist.com & Mobile App)

Environment: Angular, MySQL, iOS, and Android

Duration: December 2015 to May 2020

Client: Bruce Fikowski (Canada)

Role: Manual Tester/Automation Tester

Description:

GetAssist is a new network that is reclaiming social media as a communication tool and connecting people purposefully for both business and social purposes. There are three main features of this free social network:

1. Purposeful Network Connections - Members create, or join public communities with other like-minded people or create private Communities that are safe and secure for those invited.
2. Make GetAssist Requests - Members can Make a GetAssist Request and submit it to a Community, OR reach out to the Business Community for professional assistance.
3. Grapevine - The GetAssist ad-free Grapevine is a personal, filterable newsfeed that connects any or all of the member's network content. They can see responses to their Make GetAssist Requests and any posts from channels (credible news sources) they've selected.

Responsibilities:
➢ To perform Web App automation.
➢ To perform iOS App automation.
➢ To perform Android App automation.
➢ To create, modify & execute Scripts.
➢ To implement Generic Functions in Libraries.
➢ To perform R&D.
➢ To customize the script using parameterization techniques.
➢ To create automation documentation.
